

GEORGIA FOR GEORGIA

A voter in Georgia now has to consider all candidates for office to try to bypass as much corruption as possible. There is the option of voting for write in candidates. Valid write in candidates are legally declared as candidates and qualified to receive votes. For a write in vote to count in Georgia it must be for a legally declared and qualified candidate. As implied by the name the candidate name will have to be written in taking care to enter it just as the name the candidate qualified with. Lists of write in candidates are supposed to be posted in the poll. If voting in person and you do not see a list of write in candidates check with the poll manager. The list is also supposed to be available with absentee ballots. A voter can also check write in candidates on the Secretary of State MVP <https://mvp.sos.ga.gov/s/> web site. Checking that and investigating all candidates and noting any write in candidates you wish to vote for is a good plan for every vote. If you are supposed to have write in candidates but do not see any ask the poll manager to help you or if voting absentee contact your election office. Write in candidates are not required to qualify until September in Georgia so they may not be on a primary ballot. Below is a video that shows how to vote absentee though it mistakenly says tabulation is done at the central office. I recommend voting absentee if possible and keeping a copy to assure there is a way to account for write in votes. This information

will be made available in a downloadable, printable format.

You will not be allowed to access your phone in the voting area so tuck your selections on a piece of paper in your pocket. Share this statewide to put some stones in David's sling.
