*Please note that the agenda is subject to change at the discretion of the chairman.

"Enhanced Voting" <https://www.enhancedvoting.com/>

We vote from our phones? That once again violates the court ruling why we got Dominion. We have to insist on more paper and less electronic. All experts say paper is the best way. If the machines are not internet connected (which they are p. 98 of the Dominion contract) why would we want to throw all the voting on the internet? No problem there. I am going to start raising awareness about this with the Blue Ribbon Election Integrity committee and everybody else needs to as well. There are too many things that get hacked. We need to remove all of that from our elections. I am going to do an ORR for contracts and info on the functions of this company. I am not finding any company info on their web site or the Secretary of State business search.
